## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 23, 26-29, 31, 33-35 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Double Patenting***

2. Claims 22, 24, 25, 30 and 32 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 10 and 11 of copending Application No. 10/380,933 Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a semiconductor base comprising a substrate and a semiconductor crystal grown by vapor phase growth on the substrate where the substrate has a crystal growth plane having a concavo-convex surface and the semiconductor crystal has been grown from the concave and/or convex part, where the semiconductor substrate is a crystal structure comprising A-plane, C-plane, or R-plane, (6H, 4H, 3C) GaN.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
